

## Rio Grande LNG signs non-binding sales deals

Houston, 5 November (Argus) — NextDecade has signed non-binding agreements with Asian and European customers for the sale of 14mn t/yr of LNG, equivalent to 1.8 Bcf/d (51mn m<sup>3</sup>/d) of gas, from its planned Rio Grande LNG project in Brownsville, Texas.

“Despite challenging overall market dynamics, our experience in the marketplace and the conversations that NextDecade has been having with potential LNG buyers tell a very different story,” NextDecade chief executive Kathleen Eisbrenner said today. “The global market for US-produced LNG is robust.”

Texas-based NextDecade plans to make a final investment decision on Rio Grande LNG and the associated 140 mile (225km) Rio Bravo pipeline in early 2017. It would need to finalize some of the preliminary deals to finance the project, either as long-term liquefaction capacity or sales contracts. LNG customers have become increasingly reluctant to sign long-term deals for US liquefaction capacity since the significant fall in oil prices, which has made oil-indexed LNG from other sources cheaper.

Rio Grande is scheduled to come on line in late 2020 with initial production capacity of 9mn t/yr, and could be expanded to 27mn t/yr. The project previously said the first phase would have capacity of 13.5mn t/yr. At full build-out, Rio Grande has an estimated cost of \$23bn-27bn.

The project would be close to the prolific Eagle Ford shale formation but could get gas from a number of US producing basins, as the Rio Bravo pipeline would connect with as many as 10 other pipelines. NextDecade has a lease option with the Port of Brownsville for about 1,000 acres.

Rio Grande is in the US Federal Energy Regulatory Commission’s pre-filing review process, which is designed to identify major permitting issues and stakeholders before a formal application is filed for construction approval. The project has not applied to the US Department of Energy for export authorizations. Six LNG export projects have been proposed in the Brownsville area.

NextDecade in June raised a combined \$85mn from Valinor Management and Halcyon Energy Investors for Rio Grande and its proposed Pelican Island LNG export project in Galveston, Texas. Previously, York Capital Management provided an undisclosed amount of funding to NextDecade after South Korea’s Daewoo Shipbuilding & Marine Engineering (DSME) withdrew as a majority partner.

The 6mn-8mn t/yr Pelican Island project is scheduled to come on line 12-18 months after Rio Grande, depending on market conditions, so exports could begin in late 2021 to mid-2022, NextDecade told Argus today. NextDecade previously said Pelican Island would come on line in 2019.

**About NextDecade Corporation**

NextDecade is an LNG development company primarily focused on LNG export projects and associated pipelines in Texas. NextDecade intends to develop a portfolio of LNG projects, including the 27 mpa Rio Grande LNG export facility in Brownsville, Texas and the 4.5 Bcf/d Rio Bravo Pipeline that would transport natural gas from the Agua Dulce area to Rio Grande LNG. NextDecade's common stock is listed on the Nasdaq Stock Market under the symbol "NEXT". NextDecade is headquartered in Houston, Texas. Located at the Port of Brownsville in South Texas, NextDecade's Rio Grande LNG project is expected to be a leader among second wave U.S. LNG projects. NextDecade believes its customers and stakeholders will benefit from the project's experienced leadership, proven approach, and optimal location. NextDecade's technology solutions are expected to foster operational reliability and afford NextDecade's customers access to abundant natural gas from the Permian Basin, Eagle Ford Shale, and other basins.

**CAUTIONARY INFORMATION ABOUT FORWARD-LOOKING STATEMENTS**

This press release contains forward-looking statements within the meaning of U.S. federal securities laws. The words "believe," "expect," "intend," "plan," "potential," and similar expressions are intended to identify forward-looking statements, and these statements may relate to the business of the Company and its subsidiaries. These statements have been based on the Company's current assumptions, expectations, and projections about future events and involve a number of known and unknown risks, which may cause actual results to differ materially from expectations expressed or implied in the forward-looking statements. These risks include uncertainties about the Company's Rio Grande LNG and Rio Bravo pipeline projects and other matters discussed in the "Risk Factors" section of the Company's Annual Report on Form 10-K for the year ended December 31, 2017 and other subsequent reports filed with the Securities and Exchange Commission, all of which are incorporated herein by reference.

Any development of the projects remain contingent upon completing required commercial agreements, acquiring all necessary permits and approvals, securing all financing commitments and potential tax incentives, achieving other customary conditions, and making a final investment decision to proceed. The forward-looking statements in this press release speak as of the date of this release. Although the Company believes that the expectations reflected in these forward-looking statements are reasonable, the Company can give no assurance that the expectations will prove to be correct. The Company may from time to time voluntarily update its prior forward-looking statements, however, it disclaims any commitment to do so except as required by securities laws.
